

UZKO — Frontend dizayn tizimi

Ranglar, border, focus holatlari, shadow, radius, shrift va interaktiv holatlar bo'yicha to'liq qo'llanma (shadcn/ui + Tailwind CSS asosida, `src/styles.css` va `src/components/ui/*` fayllaridan olingan)

- 1. Asosiy ranglar (light rejim)
- 2. Qorong'i rejim (dark) ranglari
- 3. Border ranglar — barcha holatlar
- 4. Input / Select — focus holati
- 5. Text rang va shrift (typography)
- 6. Font o'lchamlari (font-size shkalasi)
- 7. Body background va sahifa foni
- 8. Border-radius shkalasi
- 9. Shadow (soya) o'lchamlari
- 10. Disabled holat — opacity
- 11. Hover ranglari (tugmalar)
- 12. Padding va margin (bo'shliq) shkalasi
- 13. Bildirishnoma / xato xabari (Toast va Alert Dialog)
- 14. Modal / Dialog o'lchamlari
- 15. Z-index qatlamlari
- 16. Animatsiya va o'tish vaqti (transition)
- 17. Vizual namuna (demo)

1 Asosiy ranglar (Light rejim)

Barcha ranglar loyihada `oklch()` formatida yozilgan (`src/styles.css, :root`). Quyida har birining taxminiy HEX ekvivalenti va qayerda ishlatilishi ko'rsatilgan.

Nomi	Rang	HEX	OKLCH (asl qiymat)	Ishlatilishi
background		#ffffff	<code>oklch(1 0 0)</code>	Sahifa foni (body)
foreground		#020618	<code>oklch(0.129 0.042 264.7)</code>	Asosiy matn rangi
card		#ffffff	<code>oklch(1 0 0)</code>	Karta / panel foni
primary		#0c33a0	<code>oklch(0.38 0.18 264)</code>	Asosiy tugmalar, aktiv holatlar, brend rang
primary-foreground		#fafcfe	<code>oklch(0.99 0.003 247.9)</code>	Primary tugma ustidagi matn
success		#036a34	<code>oklch(0.46 0.12 152)</code>	Muvaffaqiyatli holat (yashil)
secondary		#f1f5f9	<code>oklch(0.968 0.007 247.9)</code>	Ikkinchi darajali tugma / fon
muted		#f1f5f9	<code>oklch(0.968 0.007 247.9)</code>	Bosilmaydigan / fon bloklar
muted-foreground		#62748e	<code>oklch(0.554 0.046 257.4)</code>	Ikkinchi darajali matn (placeholder, izoh)
accent		#f1f5f9	<code>oklch(0.968 0.007 247.9)</code>	Hover fon (menu, select item)
destructive		#e7000b	<code>oklch(0.577 0.245 27.3)</code>	Xato / o'chirish tugmasi
border		#e2e8f0	<code>oklch(0.929 0.013 255.5)</code>	Barcha elementlarning standart border rangi
input		#e2e8f0	<code>oklch(0.929 0.013 255.5)</code>	Input/select border (odatiy holat)
ring		#90a1b9	<code>oklch(0.704 0.04 256.8)</code>	Focus ring (fokus halqasi)

2 Qorong'i rejim (Dark) ranglari

.dark klassi <html> ga qo'shilganda ishlaydi.

Nomi	Rang	HEX	Izoh
background		#020618	Juda to'q ko'k-kulrang fon
foreground		#f8fafc	Deyarli oq matn
card		#0f172b	Karta foni background'dan biroz ochroq
primary		#e2e8f0	Dark rejimda primary — och rang (kontrast uchun)
secondary / muted / accent		#1d293d	Fon bloklar
destructive		#ff6467	To'q fonda o'qilishi uchun yorqinroq qizil
border / input		rgba(255,255,255,0.10) / 0.15	Oq rangning shaffof varianti — qattiq HEX emas
ring		#6a7282	Focus halqasi (dark)

3 Border ranglar — barcha holatlar

Holat	Rang	Qiymat	Qayerda
Standart (default)		border-input / border-border → #e2e8f0	Barcha input, select, card, tugma border'i
Global qoida	—	* { border-color: var(--color-border); }	styles.css 141–144-qatorlar — hech qanday border rang belgilanmasa ham shu ishlaydi
Mobil karta border'i		rgba(148,163,184,0.20–0.22)	1024px dan kichik ekranlarda .responsive-card, topbar, bottombar
Kurs bloki (rates)		rgba(8,54,176,0.12)	Mobil rejimda .uzko-rates > div
Dark rejim		rgba(255,255,255,0.10)	Barcha border, dark rejimda

Muhim: loyihada border va input rangi bir xil (#e2e8f0) — ya'ni oddiy border va input border farqlanmaydi, ikkalasi ham juda och kulrang.

4 Input / Select — Focus bo'lgan holatdagi border va rang

Loyihada Input va SelectTrigger komponentlari uchun focus ko'rinishi Tailwind ring mexanizmi orqali beriladi (border rangi o'zgarmaydi, atrofida halqa — *ring* paydo bo'ladi).

Xususiyat	Oddiy holat	Focus holat
Border rangi	<code>border-input → #e2e8f0</code>	o'zgarmaydi (<code>#e2e8f0</code>)
Focus ring rangi	—	<code>ring-ring → #90a1b9</code> (1px halqa)
Ring qalinligi	—	<code>focus-visible:ring-1 → 1px</code>
Outline	—	<code>focus-visible:outline-none</code> – brauzer default outline o'chirilgan
Matn rangi	<code>foreground → #020618</code>	o'zgarmaydi
Placeholder rangi	<code>muted-foreground → #62748e</code>	o'zgarmaydi
Shadow	<code>shadow-sm</code>	<code>shadow-sm</code> (o'zgarmaydi, faqat ring qo'shiladi)

Amaldagi CSS klassi (Input komponenti)

```
h-9 rounded-md border border-input bg-transparent px-3 py-1 text-base shadow-sm focus-visible:outline-none focus-visible:ring-1 focus-visible:ring-ring disabled:opacity-50 md:text-sm
```

Amaldagi CSS klassi (Select Trigger)

```
h-9 rounded-md border border-input bg-transparent px-3 py-2 text-sm shadow-sm focus:outline-none focus:ring-1 focus:ring-ring disabled:opacity-50
```

Tavsiya: agar focus holatida border rangini ham o'zgartirish kerak bo'lsa (masalan primary rangga), `focus-visible:border-primary` klassini qo'shish kifoya — hozircha loyihada faqat ring ishlatilgan, border statik qoladi.

5 Text rang va shrift oilasi (Typography)

Element	Rang	Shrift oilasi
Asosiy matn (body)	<code>foreground → #020618</code>	Tailwind default sans-stack: <code>ui-sans-serif, system-ui, -apple-system, "Segoe UI", Roboto, Helvetica, Arial</code> (loyihada maxsus shrift, masalan Inter/Geist, ulanmagan)
Ikkinchi darajali matn / placeholder	<code>muted-foreground → #62748e</code>	
Primary tugma ustidagi matn	<code>primary-foreground → #fafcfe</code>	
Xato matni	<code>destructive → #e7000b</code>	

6 Font o'lchamlari (Font-size shkalasi)

Tailwind klass	O'lcham	Piksel	Ishlatilishi
text-[10px]	10px	10px	Eng kichik yorliqlar (mobil brend belgisi)
text-xs	0.75rem	12px	Yordamchi matn, badge, kichik tugmalar
text-sm	0.875rem	14px	Standart input/select matni (md ekranlarda)
text-base	1rem	16px	Input matni (mobil, iOS zoom oldini olish uchun 16px majburiy)
text-lg / text-xl	1.125–1.25rem	18–20px	Kichik sarlavhalar
text-2xl	1.5rem (mobil: 1.25rem)	24px (20px)	Sahifa sarlavhalari

Muhim qoida: 1024px dan kichik ekranlarda input, select, textarea har doim font-size: 16px !important qilib qo'yilgan — bu iOS Safari'ning avtomatik zoom qilishining oldini oladi.

7 Body background va sahifa foni

Holat	Rang / qiymat
Standart (desktop, light)	background → #ffffff (oklch(1 0 0))
Standart (desktop, dark)	background → #020618
Mobil/planshet (≤1024px)	oklch(0.97 0.008 247.9) ≈ #f6f8fa — sal kulrang fon, kartalar oq bo'lib ajralib turadi
App-shell fon (mobil)	linear-gradient(180deg, #fcfdfe → #f4f6f8)

8 Border-radius shkalasi

Asosiy o'zgaruvchi: --radius: 0.625rem (10px). Qolgan barcha radius shundan hisoblanadi:

Nomi	Formula	Piksel	Ko'rinishi
radius-sm	radius - 4px	6px	
radius-md	radius - 2px	8px	
radius-lg	radius	10px	
radius-xl	radius + 4px	14px	
radius-2xl	radius + 8px	18px	
radius-3xl	radius + 12px	22px	
radius-4xl	radius + 16px	26px	
Input / Select / Button	rounded-md	8px	Standart interaktiv elementlar
Mobil karta / dialog	1rem - 1.25rem	16–20px	Kattaroq radius — mobil uchun yumshoqroq ko'rinish
Tugma / tab (pill)	rounded-full (999px)	to'liq dumaloq	Mobil nav, tab, kurs bloklari

9 Shadow (soya) o'lchamlari

Nomi	CSS qiymati	Qayerda ishlatiladi
shadow-sm	<code>0 1px 2px 0 rgba(0,0,0,0.05)</code>	Input, Select, Destructive/Secondary tugma
shadow (default)	<code>0 1px 3px 0 rgba(0,0,0,0.1), 0 1px 2px -1px rgba(0,0,0,0.1)</code>	Default (primary) tugma
Mobil karta soyasi	<code>0 10px 28px rgba(15,23,42,0.06)</code>	<code>.responsive-card</code> , $\leq 1024\text{px}$
Mobil topbar soyasi	<code>0 8px 24px rgba(15,23,42,0.06)</code>	<code>.uzko-topbar</code> , $\leq 1024\text{px}$ (v21)
Kattaroq karta soyasi	<code>0 14px 34px rgba(15,23,42,0.08)</code>	<code>.responsive-card</code> (v21 versiya)
Ichki chegara (inset)	<code>inset 0 0 0 1px rgba(148,163,184,0.18-0.22)</code>	Tab panellari — border o'rniga soya bilan chegara chizilgan
Focus ring "soyasi"	<code>0 0 0 1px (ring-1 orqali) rangi: #90a1b9</code>	Input/Select fokus holati

10 Disabled holat — Opacity darajasi

Element	Opacity	Qo'shimcha
Input / Select / Button (barchasi)	50% (<code>opacity-50</code>)	<code>disabled:cursor-not-allowed / disabled:pointer-events-none</code>
Select item (tanlanmaydigan)	50%	<code>data-[disabled]:opacity-50 + pointer-events-none</code>
Chevron ikonka (select)	50% (doimiy, disabled emas)	Faqat vizual — asosiy ikonka emasligini bildirish uchun

Faol tugma

O'chirilgan (50%)

11 Hover bo'lgandagi ranglar

Tugma varianti	Oddiy holat	Hover holat
Default (primary)	<code>bg-primary → #0c33a0</code>	<code>hover:bg-primary/90 → #0c33a0</code> (90% shaffoflik, sal tiniqroq)
Destructive	<code>bg-destructive → #e7000b</code>	<code>hover:bg-destructive/90</code>
Secondary	<code>bg-secondary → #f1f5f9</code>	<code>hover:bg-secondary/80</code> (80% shaffoflik)
Outline	<code>bg-background (shaffof)</code>	<code>hover:bg-accent hover:text-accent-foreground → fon #f1f5f9, matn #0f172b</code>
Ghost	fon yo'q	<code>hover:bg-accent hover:text-accent-foreground</code>
Link	<code>text-primary, underline yo'q</code>	<code>hover:underline</code> (faqat tag chiziladi)
Select item	fon yo'q	<code>focus:bg-accent focus:text-accent-foreground</code> (klaviatura/hover bilan bir xil)

Default

Default (hover)

Destructive

Outline

Secondary

12 Padding va margin (bo'shliq) shkalasi

Loyiha Tailwind CSS ning standart spacing shkalasidan foydalanadi (1 birlik = 0.25rem = 4px). Quyida amalda eng ko'p ishlatiladigan qiymatlar va ular ishlatilgan joylar:

Tailwind klass	Piksel	Rem	Qayerda ishlatiladi
p-1 / gap-1	4px	0.25rem	Select item ichki bo'shlig'i (pl-2 bilan birga)
p-1.5	6px	0.375rem	Select label yuqori/pastki bo'shlig'i
p-2 / gap-2	8px	0.5rem	Tugmalar orasidagi standart masofa (Dialog/AlertDialog footer: space-x-2)
px-3 / py-1-2	12px / 4–8px	0.75rem / 0.25–0.5rem	Input va Select ichki bo'shlig'i (yon 12px, tepa-past 4–8px)
p-4 / gap-4	16px	1rem	Mobil kartalarning standart ichki bo'shlig'i, Dialog/AlertDialog content gap
p-6	24px	1.5rem	Card (CardHeader, CardContent, CardFooter) va Dialog/AlertDialog content ichki bo'shlig'i — asosiy "katta" bo'shliq
right-4 / top-4	16px	1rem	Dialog yopish (X) tugmasining o'ng-yuqori burchakdan masofasi
space-y-1.5	6px (vertikal)	0.375rem	CardHeader va DialogHeader ichidagi elementlar orasi
space-y-2	8px (vertikal)	0.5rem	AlertDialogHeader ichidagi elementlar orasi

Mobil rejimda (≤1024px) bo'shliqlar qisqaradi

Element	Desktop	Mobil (≤1024px)	Kichik telefon (≤640px)
Asosiy kontent (.responsive-main)	standart	padding: 0.5–0.65rem (8–10px)	padding: 0.4–0.5rem (6–8px)
Jadval katakchasi (th/td)	standart	padding: 0.55–0.65rem	padding: 0.48–0.5rem
Tugma/tab ichki bo'shlig'i	px-4 (16px)	0.55–0.9rem (9–14px)	0.68–0.8rem (11–13px)
Dialog/Modal chekka masofasi	—	max-width: calc(100vw - 1rem)	bir xil

Qoida: bo'shliqlar har doim 4px karra li bo'lishi kerak (Tailwind shkalasi: 4, 8, 12, 16, 20, 24px...) — bu butun loyihada vizual ritmni bir xil ushlab turadi.

13 Bildirishnoma / xato xabari — Toast va Alert Dialog

Loyihada ishlatilayotgan kutubxona: sonner (native brauzer alert() emas, react-toastify ham emas). Har bir sahifa (route) o'zining `<Toaster position="top-center" richColors />` komponentini o'z ichiga oladi.

Funksiya	Rang (richColors bilan)	Qachon ishlatiladi
<code>toast.success(...)</code>	 yashil	Saqlash, qo'shish, o'chirish muvaffaqiyatli bo'lganda
<code>toast.error(...)</code>	 qizil	Validatsiya xatosi, so'rov muvaffaqiyatsiz bo'lganda
<code>toast.warning(...)</code>	 sariq	Ogohlantirish (masalan chegirma juda katta)
<code>toast.info(...)</code> / <code>toast.loading(...)</code>	 ko'k	Ma'lumot berish / jarayon ketayotganini bildirish

Toast pozitsiyasi va uslubi (src/components/ui/sonner.tsx)

Xususiyat	Qiymat
Ekrandagi joyi	top-center – ekran tepasi, markazda
Fon	bg-background (light: #ffffff, dark: #020618)
Matn rangi	text-foreground
Border	border-border → #e2e8f0
Shadow	shadow-lg
Description (izoh) matni	text-muted-foreground → #62748e
Action tugma (masalan "Bekor qilish")	bg-primary / text-primary-foreground

Muhim xabarlar / tasdiqlash uchun — AlertDialog

Oddiy bildirishnoma (toast) o'rniga, **qaytarib bo'lmaydigan amallar** uchun (masalan mijozni o'chirish) loyihada Radix `@radix-ui/react-alert-dialog` asosidagi `AlertDialog` komponenti ishlatiladi — bu foydalanuvchidan "Ha / Yo'q" tasdig'ini talab qiladigan modal oyna.

Qism	Uslub
Overlay (fon qorayishi)	bg-black/80 (qora, 80% shaffof)
Content foni	bg-background, border, shadow-lg, rounded-lg (sm dan boshlab)
Kenglik	max-w-lg (512px), ekran markazida
Sarlavha (Title)	text-lg font-semibold (18px, yarim qalin)
Izoh (Description)	text-sm text-muted-foreground
Footer tugmalari orasi	space-x-2 (8px), mobil rejimda pastma-past (flex-col-reverse)

Qoida: `alert()`, `confirm()` kabi brauzerning native funksiyalari loyihada ishlatilmaydi — ular dizaynga mos kelmaydi va mobil qurilmalarda yomon ko'rinadi. O'rniga: oddiy xabar uchun `toast.success/error`, tasdiqlash talab qiluvchi amal uchun `AlertDialog` ishlatiladi.

14 Modal / Dialog o'lchamlari

Xususiyat	Qiymat
Joylashuvi	fixed, top: 50%, left: 50%, markazda (translate -50%/-50%)
Maksimal kenglik (desktop)	max-w-lg → 32rem (512px)
Maksimal kenglik (mobil, ≤640px)	calc(100vw - 1rem) — chekkalardan 8px joy qoladi
Maksimal balandlik (mobil, ≤1024px)	min(86dvh, 720px) yoki calc(100dvh - 1rem)
Ichki bo'shliq (padding)	p-6 (24px)
Ichki elementlar orasi (gap)	gap-4 (16px)
Border-radius (desktop)	sm:rounded-lg → 10px
Border-radius (mobil)	1rem - 1.25rem (16-20px)
Ochilish/yopilish animatsiyasi	fade + zoom-95-100 + slide, duration-200 (200ms)
Yopish (X) tugmasi	right-4 top-4, opacity-70 → hover:opacity-100

15 Z-index qatlamlari

Qatlam	z-index	Element
Asosiy kontent	0 (auto)	Sahifa tanasi
Sticky panel (mobil filter)	20-25	.nasiya-filter-panel, .uzko-bottombar (ba'zi holatlar)
Sticky topbar (mobil)	40-50	.uzko-topbar
Bottombar (sticky, mobil)	30-45	.uzko-bottombar
Dialog / Select / Popover overlay va content	50	Radix Dialog, Select, AlertDialog — eng tepada
Toast (sonner)	Sonner ichki boshqaruvida (odatda 50 dan yuqori)	Har doim barcha modal'lar ustida ko'rinadi

Qoida: har qanday yangi floating element (dropdown, tooltip, popover) uchun z-50 dan pastroq ishlatilmasin — aks holda Dialog yoki Select ostida qolib ko'rinmasligi mumkin.

16 Animatsiya va o'tish vaqti (Transition)

Element	Transition	Davomiyligi
Input / Select / Button rang o'zgarishi	transition-colors	150ms (Tailwind default)
Dialog / AlertDialog / Select content	animate-in / animate-out (fade + zoom + slide)	duration-200 (200ms)
Dialog Close tugmasi opacity	transition-opacity	150ms
Select zoom animatsiyasi	zoom-in-95 / zoom-out-95	content 95% dan 100% ga o'sadi

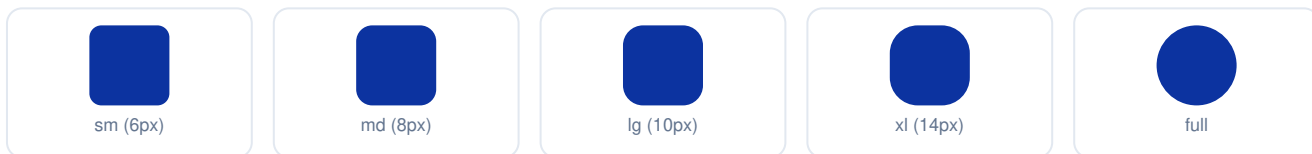

17 Vizual namuna (Demo)

Input — oddiy va focus holati

Oddiy holat

Focus holati (ring-1, #90a1b9)

Border-radius taqqoslash

Rang palitrasi — asosiy

Toast (sonner) namunasi

AlertDialog namunasi (tasdiqlash oynasi)

Manba fayllar: `src/styles.css` (ranglar, radius, media-query'lar), `src/components/ui/{input,select,button,card,dialog,alert-dialog,sonner}.tsx`. Barcha qiymatlar shu fayllardan to'g'ridan-to'g'ri olingan — taxminiy emas.
